

IYUNO
Los Angeles

OCHANOMIZU (Male, 60s)

Voice Description: A grizzled, weathered voiceprint that contrasts his kind nature.

Character Description: PASSIONATE. SENSITIVE. VIRTUOUS.

Professor Ochanomizu is the Minister of Science. Fueled by a fiery sense of justice, he is a firm advocate for robot rights.

Outspoken and righteous, he uses his influence as a platform for the greater good. As caring as he is humble, he acts as a guardian for his creation Uranium and her brother Atom. He dotes over his own family, as both a father and grandparent.

Unlike his predecessor and former friend Dr. Tenma, Ochanomizu leads with his heart. Tenma, a genius robotics professor and Atom's creator, was reckless and abused his power. Ochanomizu strives to right the wrongs of the past, deeply impacted by his colleague's poor treatment of others.

Above all, he wants to protect robots and ensure they have a peaceful future with humanity.

TONE: Looking for grounded, cinematic reads.

DIALOGUE

Ochanomizu explains to Atom (a young robot) how a fact-finding mission he was on in the Middle East served as the linchpin for this world's version of the Iraq War. Along the way, he mentions fellow observers Bernard Lanke and Tazaki, both of whom were recently murdered under mysterious circumstances.

ATOM: How about Bernard Lanke? He was a key member of a group advocating for Robot Laws.

OCHANOMIZU: Yes, I know him. Haven't seen him in years, though. What about him?

ATOM: He's dead. Professor, where did you meet Mr. Lanke?

OCHANOMIZU: Oh. Eh- well, it started with the suspicion that the Kingdom of Persia had robots of mass destruction.

That's when the treaty banning their manufacture was proposed. And the U.N. ratified it right away.

Not long after, the Kingdom of Persia was formally accused of having exactly those kinds of robots. The Bora Fact-Finding Mission was sent to check it out, and so it began.

Honestly, none of us knew what Bora even meant. Was it a code name? Or was it maybe an acronym? We really didn't have a clue. But that didn't stop any of us from taking part in the mission. Bernard Lanke, myself... or Tazaki.
