

Zarude – Mystical Simian Pokemon – Dark/Grass Type

Zarude – Zarude is a dark grass type Pokemon that lives deep in the jungle. It protects the mystical healing river and the magical tree that feed it. Brave and aggressive these are warriors. They believe in strength and fear nothing. They live by a code of conduct that values Zarude and the stream above other Pokemon. Extremely territorial, they travel through the jungle by the vines that wrap around their arms and for the most part embrace a bit of “to the victor go the spoils”. They protect their species by keeping others, especially humans, away from their lands.

Scene 1 – ZARUDE challenge each other and battle

The concept behind pokemon is that they “say their names” but we do not just “say the name” clearly. It's an animal sound - like meow - or ruff- that humans interpret the sound as. (Dogs don't say bow wow when they bark- but we might call dogs bow wows in this world). You can use any variants of the name as language, (Zarude, Za, Zar, Zaru, Zad etc). Think of the Pokemon not only as reacts but as language almost like Babble. You should be able to converse and share emotion/personality. And you should have a larger attack move for battle.

You can find a trailer and movie clips online here:

. This can be short. I just want to hear an active sequence of separate clear distinct action beats. There will be multiple Zarude cast. If you are reading for a Zarude speaking role, you only have to submit this creature portion ONCE in its own file.

1. Fighting reacts as you grapple with other Zarude over a disagreement
2. Fast paced chasing: run to a vine, leap in air grab it, swinging through forest 3xs, leap and flip and land on your feet
3. Jeering and upset warning growls as one of your own betrays you.
4. Suspicious sniffing and growling
5. Cheering and celebration
6. Angry Roar

I am not looking for an exact voice match of the Japanese. What I want is the spirit of the creature. Personality is important. Ideally we would create more in session. Feel free to give multiple takes if they are different approaches.
